centre**

Eye-Screen Display (EyeD) allows users to view information (text, graphics or video) on the move, without obstructing their field-of-view, while keeping their hands free to perform other tasks.

## Characteristics:

- High image definition at the centre and periphery
- See-through capability
- High wearing comfort
- Quick and intuitive adjustment of the virtual colour image
- Allows the use of glasses
- No additional software required
- Cost efficiency
